Horizon Training School: 5 Day, Medium Voltage Power Systems Operation Course (Compatible with Irish Legislation)

COVID 19 Compliant

- Open for business with reduced class sizes to maintain a Covid safe environment. Staff participate in the Department of Health's Employer Asymptomatic Covid Testing Programme. For further details see www.health-ni.gov.uk

About Us

- We are Northern Ireland's first facility for Medium & Low Voltage systems training. For the first time, engineers with the necessary aptitude and qualifications can undertake accredited training, to further their knowledge and competency right here in Belfast.

Prime Location

- Our training school is less than two hours journey from Dublin airport via the M1. The 5-day MV course starts at 10 am on day one (Monday) to allow travel time, all other days (Tuesday to Friday) start at 8.15am.

Horizon Training School: 5 Day, Medium Voltage Power Systems Operation Course (Compatible with Irish Legislation)

Our Facilities

- Our course is structured around classroom-based activities and practical exercises. It features a simulated Medium Voltage and Low Voltage Electrical Sub-station with all statutory signage and is equipped with MV and LV switchgear as used in the field.
- The Sub-station features fully equipped MV/LV System Mimic panel, typical safety “lock-out tag-out” system, warning notices and life safety systems typically found in an Electrical MV/LV Sub-station.

Knowledge Based Training

- We are Northern Ireland’s first facility for Medium & Low Voltage systems training. For the first time, engineers with the necessary aptitude and qualifications can undertake accredited training, to further their knowledge and competency right here in Belfast.

Who should attend this course?

- Delegates who wish to be considered for nomination as an electrical Authorised, Competent or Skilled Person within their organisation and who need to demonstrate that they have undertaken an accredited training course in the safe operation of Medium Voltage power systems in accordance with the requirements of their organisation Electrical Safety Rules.

Horizon Training School: 5 Day, Medium Voltage Power Systems Operation Course (Compatible with Irish Legislation)

Turnkey Booking Package Available

Let us make planning your employees training an easy, hassle free process. In addition to the five-day training at our centre, we can arrange accommodation and transport for delegates through our turnkey package.

- This includes:
 - Transport to & from our training centre when travelling from our accommodation partner apartments
 - Transport to & from public transport stations and airports in Belfast at the start and end of the training course

Package Details

- Package includes:
 - Transport to & from our training centre when travelling from our accommodation partner apartments
 - Transport to & from public transport stations and airports in Belfast at the start and end of the training course
- If using your own vehicle, we can provide free parking both at our training facility and at the accommodation
- Serviced accommodation at Dream Apartments Belfast, check in Monday, check out Friday.

Course and Accomodation Cost

- Cost for MV course and accommodation is **€1700 (£1475) per delegate.**
- Should transport be required a price will be determined upon booking.

Dream Apartments Belfast

- Dream Apartments: Obel Tower, 64 Donegal Quay, Belfast, BT1 3NG
www.dreamapartments.co.uk
- Situated by the River Lagan and within close proximity to Belfast's city centre, the buzzing Cathedral Quarter and Victoria Square shopping centre. Only 1.4 miles, approximately six-minute drive or taxi journey to & from the training school.
- Medium Voltage course runs each month, next start date is May 31st. Specific dates can be set to meet the needs of our delegates.
- All Euro rates are subject to change based on market rate at time of booking.
