HORIZON

Authorising Engineer (MS1)

A course for learners who have been selected for appointment as Authorising Engineer's (AE), and those required to superintend or audit work activities relating to or involving significant risk activities on Electrical or Mechanical services.
Learners attending the course, who are to be appointed as AE's should be familiar with their organisations Safe Systems of Work.

Date & Location:
-   26th & 27th July, 2023
-   Horizon Engineering Solutions, Ravenhill Business Park, Ravenhill Road, Belfast, BT6 8AW

Benefits for the learner:
-   A greater understanding of the role of an Authorising Engineer and confidence to manage safety systems.

Benefits for employer:
-   Compliance with legislation and Safe Systems of Work.
-   An independent recommendation of suitability as an Authorising Engineer.
-   Better documentation, communication, and enforcement of safe working procedures.

What you will learn:
-   An introduction to the management of Safe Systems of Work.
-   An introduction to relevant Health & Safety legislation within the UK.
-   The need for Safety Management Systems.
-   The Structure, Roles and Responsibilities of Authorising Engineers and Authorised Persons.
-   Behaviour Based Safety, Selection, Evaluation and Appointment of Authorising and Authorised Persons.
-   Training requirements for new and in service AE's, AP's and SKP's.
-   AE Focal Point duties including Incident and Accident Investigation, Competence Assessment, Monitoring and Auditing.

How is the training delivered?
-   The theory of the course is classroom based, where possible practical examples are used to illustrate the duties of an Authorised Engineer.

Qualifications available:
-   You will receive a certificate of attendance.

Cost:
-   £900 pp + VAT
